## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, 15-23, drawn to a memory interface, classified in class 711, subclass 115.
  - II. Claims 11-14 and 24-26, drawn to a method to design a memory interface, classified in class 716, subclass 18.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions is that the group I is about an apparatus of a memory interface and the group II is about a method to design a memory interface. They are different from each other since the method to design a memory interface involves with using computer and software to design and optimize a circuit while the memory interface involves with improving the transfer data speed.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2824
